

**Call for book chapter on a Roundtable Workshop for the
BRICS Research Institute' COPs to be hosted in India on the 24-25 May 2024**

by

Pandit Deenday Energy University (PDEU)

Book and Conference Title:

“Energy Resilience and Sustainability in BRICS+ Nations – A Policy Analysis Perspective”

Aim of the book: This book embarks on a comprehensive exploration of the dynamic landscape inhabited by the BRICS+ nations, a collective that includes established BRICS+ members and prospective additions on the precipice of extraordinary growth. At its core, the narrative confronts the looming specter of structural shocks, with a keen focus on the energy sector, and the profound implications these disruptions pose for the economic potential of these nations.

The primary aim is to underscore the critical importance of energy resilience and sustainability in the contemporary world, unraveling the intricate role played by a dependable energy supply in facilitating the seamless functioning and well-being of modern societies. The book navigates the intricate challenge faced by emerging economies in balancing energy supplies and demand, advocating for a reduction in short-term volatility to fortify this delicate equilibrium.

Suggested chapter titles:

Part I: Energy Policy and Governance

Introduction to energy resilience and sustainability in BRICS Plus Nations

The role of government policy in promoting energy access and efficiency

Comparison study on management of energy supplies against energy demands in BRICS Plus

Part II: Energy Economics

Political and economic stability as a result of energy resilience and sustainability

The impact of energy shocks on efficiency in BRICS+ economies

Implications of conflicts in energy economics
BRICS Plus NDCs towards sustainable energy transitions

Part III: Politics of Renewable Energy

The adoption and reflections of renewable energies in BRICS Plus Nations

Just energy transition financial implications to BRICS Plus Nations

Abstract: 250 words

Abstract Deadline: 15 February 2024
